EXPLANATORY STATEMENT

The figures relating to Births and Deaths are tabulated from Returns furnished by the Local Registrars, and those relating to Marriages from Returns received from the Clergy, Authorised Persons, Registrars of Marriages, &c.

In this Return births and deaths are classified by place of occurrence in tables IV, V and VI but by area of residence in tables IX, X and XI. For the purposes of the Annual Review births and deaths will continue to be assigned by place of residence.

The deaths of non-civilians are excluded from tables IV, V, VI, IX, X and XI.

Estimates of Total National Populations are shown in table II and of Civilian National and Local Populations in tables IV, V, VI, IX, X and XI.

Meteorological information is suspended until further notice.

The figures relating to Notifications of Infectious Diseases are summarised from special quarterly statements supplied by Medical Officers, which give the numbers of cases originally notified and the final numbers after correction distinguishing sex and age. A table summarizing the previous quarter's sex and age distribution of the several notifiable diseases in England and Wales appears in this Return.

Note—The Returns for the quarters ending 30th June and 31st December contain lists of the changes of boundaries of administrative areas during the six months ending on these dates while summaries of certain figures for the year are published in the December and March quarterly issues (see tables IX–XII).

QUARTERLY DEATHS BY CAUSE DURING 1943–1945.

An appendix table (page 18) shows the deaths of males and females from 36 selected causes registered during each quarter of the years 1943, 1944 and 1945. Corresponding figures for 1938, 1939 and 1940 were given in the Return for the March quarter of 1941. (For Rheumatic fever see page 12 of June Quarterly Return, 1941, and for Tuberculosis of the Meninges, etc., the Return for June, 1942.) Corresponding figures for 1941 and 1942 were shown in the Return for March, 1944.

NOTES ON THE FIRST QUARTER OF 1946

ENGLAND AND WALES.

Births.

The birth rate, based upon the total population of England and Wales as at Mid-1945, was 17.2 per 1,000 compared with 16.9 in the first quarter of 1945. In the five years prior to 1945 the average rate for the first quarters was 15.7.

Of the births registered 93,225 were males and 88,220 females, a proportion of 1,057 males to 1,000 females; the average for the 10 preceding first quarters was 1,061.

The number of illegitimate births, included in the total, was 14,577 which was 3,061 less than in the first quarter of 1945.

The 5,178 stillbirths represent 2.8 per cent. of the total births registered.

Deaths.

The death rate based upon the Mid-1945 population was 14.8 per thousand compared with 15.0 for the first quarter of 1945. In the five years prior to 1945 the average rate for the first quarters was 15.7.

Of the deaths registered 78,737 were males and 76,416 females, a proportion of 1,030 males to 1,000 females.

Infant mortality, provisionally corrected, was 55 per 1,000 related live births, and was 14.4 below the average of the 10 preceding first quarters. The deaths totalled 9,598. In the previous four quarters the rates were 59, 41, 38 and 46. The diarrhoea death rate under 2 years of age was 5.6 per 1,000 live births (1,019 deaths) compared with 5.4, 5.0, 6.2, and 5.5 in the four preceding quarters.

Smallpox was mentioned as a cause of death in 3 entries. These deaths, 2 of which occurred in Colchester M.B. and the other in Southend-on-Sea C.B. have been provisionally classified to Smallpox and assigned to Thurrock U.D. (2) and Southend-on-Sea C.B. There were 14 cases notified, 1 in Westminster Met. B., 2 in Hampstead Met. B., 7 in Thurrock U.D., 1 in Scarborough M.B., 1 in Colchester M.B., 1 in Bebington M.B., 1 in Southend-on-Sea C.B. and 7 in Port Health Districts.

Natural Increase or Decrease.

The births registered exceeded the deaths by 26,292. The corresponding increases in the first quarters of 1943, 1944 and 1945 were 34,693, 37,934 and 20,201 respectively.

Marriages.

The 154,960 persons married in the quarter were 1,732 more than in the first quarter of 1945, but were 6,720 lower than the average for the first quarters of the five years prior to 1945.

UNITED KINGDOM AND EIRE.

228,487 births and 193,355 deaths were registered in the quarter, representing a natural increase of 35,132. The number of persons married is not available. (See the Returns published by the respective Registrars-General for Scotland, Northern Ireland and Eire.)

(a) Provisional. (b) Provisional rates based upon mid-1945 population.

(c) Note :—An exceptional number of marriages are celebrated at Easter and the sequence of quarterly marriage totals is accordingly influenced by fluctuations, as between the 1st and 2nd quarter, of the position of Easter. The date of Easter Sunday in each year of record is shown in the first line of the table below.

(d) Approximate reproduction rates, corresponding to the births which occurred in each year and making allowance for a continuing improvement in survivorship conditions, are shown in the second line of the table below.

(e) Including Armed Forces and Merchant Seamen at home and abroad.

† The births and deaths for Edinburgh, Glasgow, Dublin and Belfast are classified according to area of residence. Deaths of non-civilians are included in the figures for Dublin and Belfast but excluded in the case of Edinburgh and Glasgow where deaths from enemy action are also excluded. The population for Dublin is estimated to middle of 1946.

TABLE VI.—ESTIMATED CIVILIAN POPULATION AT 31ST MARCH, 1946, AND BIRTHS, CIVILIAN DEATHS AND DEATHS OF INFANTS UNDER 1 YEAR OF AGE registered in the Quarter ended 31st March, 1946.

148 Smaller Towns (with estimated resident population at 1931 Census of 25,000–50,000).

EXPLANATORY STATEMENT

The figures relating to Births and Deaths are tabulated from Returns furnished by the Local Registrars, and those relating to Marriages from Returns received from the Clergy, Authorised Persons, Registrars of Marriages, &c.

In this Return births and deaths are classified by place of occurrence. For the purposes of the Annual Review, births and deaths will continue to be assigned by place of residence.

The deaths of non-civilians are excluded from tables IV, V and VI.

Estimates of Total National Populations are shown in table II and of Civilian National and Local Populations in tables IV, V and VI.

Meteorological information is suspended until further notice.

The figures relating to Notifications of Infectious Diseases are summarised from special quarterly statements supplied by Medical Officers, which give the numbers of cases originally notified and the final numbers after correction distinguishing sex and age. A table summarizing the previous quarter's sex and age distribution of the several notifiable diseases in England and Wales appears in this Return.

Note—The Returns for the quarters ending 30th June and 31st December contain lists of the changes of boundaries of administrative areas during the six months ending on these dates (*see* Table IX) while summaries of certain figures for the year are published in the December and March quarter issues.

QUARTERLY DEATHS BY CAUSE DURING 1944-1946.

An appendix table (page 12) shows the deaths of males and females from 36 selected causes registered during each quarter of the years 1943, 1944 and 1945. Deaths for March Quarter, 1946 are not yet available but will be included in the next Quarterly issue. Corresponding figures for 1938, 1939 and 1940 were given in the Return for the March quarter of 1941. (For Rheumatic fever *see* page 12 of June Quarterly Return, 1941, and for Tuberculosis of the Meninges, etc., the Return for June, 1942.) Corresponding figures for 1941 to 1943 were shown in the Return for March, 1944.

NOTES ON THE SECOND QUARTER OF 1946

ENGLAND AND WALES.

Births.

The number of births registered during this quarter was 203,797, representing a birth rate based on the total population of England and Wales for 1945 of 19.2 per thousand. These figures compare with 175,221 births and a rate of 16.5 for the corresponding quarter of 1945; and an average birth rate for the second quarters of the five years 1940-1944 of 16.5. The number of births registered was the highest recorded for any quarter since 1922.

Of the births registered 105,283 were males and 98,514 females, a proportion of 1,069 males to 1,000 females. The average for the second quarters of the ten years 1936-1945 was 1,058.

The number of illegitimate births included in the total was 14,789 which in spite of the increased number of births, was 2,625 less than in the corresponding quarter of 1945.

The 5,764 stillbirths represent 2.8 per cent. of the total births registered.

Deaths.

The number of deaths registered was 114,070 representing a death rate, based on the 1945 population, of 10.7 per 1,000, compared with 10.4 for the corresponding quarter of 1945 and an average death rate for the second quarters of the five years 1940-1944 of 11.6. Of the deaths registered 58,501 were males and 55,569 females, a proportion of 1,053 males to 1,000 females.

The deaths of children under one year of age numbered 7,624 representing an infant mortality rate, provisionally corrected, of 41 per 1,000 related live births; this was 9 per 1,000 below the average rate for the second quarters of the ten preceding years 1936-1945. The diarrhoea death rate for children under two years of age was 4.2 per 1,000 live births (852 deaths) compared with 5.0, 6.2, 5.5 and 5.6 in the four preceding quarters.

Smallpox.

Smallpox was mentioned as a cause of death in 10 entries (including 2 non-civilians). These deaths have been provisionally classified to Smallpox and those of the civilians, which occurred in Colchester M.B. (1) and Bebington M.B. (7), have been provisionally assigned to Southend-on-Sea C.B. (1), Birkenhead C.B. (5) and Liverpool C.B. (2). There were 34 cases (including 3 non-civilians) notified as follows:—Bebington M.B. 3, Birkenhead C.B. 10, Ilford M.B. 1 (Imported), Liverpool C.B. 11 (6 Imported), Manchester C.B. 1 (Imported), Plymouth C.B. 1, Rochester M.B. 1, Southend-on-Sea C.B. 4 and Port Health Districts 2.

Natural Increase.

The births registered exceeded the deaths by 89,727, the corresponding increases for the second quarters of the years 1943, 1944 and 1945 being respectively 67,797, 83,491 and 64,252.

Marriages.

The number of persons married during the quarter was 201,628 which was ^{13,240}~~87,586~~ more than the average for the corresponding quarters of the preceding five years 1941-1945.

UNITED KINGDOM AND EIRE.

The number of births, deaths and marriages registered in the quarter are not yet available. (*See* the Returns published by the respective Registrars-General for Scotland, Northern Ireland and Eire.)

(a) Provisional.

(b) Note:—An exceptional number of marriages is celebrated at Easter which usually falls in the second quarter of the year. In the years under review, however, Easter Sunday fell in the first quarter in 1937 and 1940, with a consequential influence on the quarterly marriage totals for those years.

(c) Including Armed Forces and Merchant Seamen at home and abroad.

(d) Provisional rates based upon 1945 population.

APPROXIMATE REPRODUCTION RATES.

These approximate reproduction rates correspond to the births which occurred in each year and make allowance for a continuing improvement in survivorship conditions.

EXPLANATORY STATEMENT

The figures relating to Births and Deaths are tabulated from Returns furnished by the Local Registrars, and those relating to Marriages from Returns received from the Clergy, Authorised Persons, Registrars of Marriages, &c.

In this Return births and deaths are classified by place of occurrence. For the purposes of the Annual Review, births and deaths will continue to be assigned by place of residence.

The deaths of non-civilians are excluded from tables IV, V and VI.

Estimates of Total National Populations are shown in table II and of Civilian National and Local Populations in tables IV, V and VI.

Meteorological information is suspended until further notice.

The figures relating to Notifications of Infectious Diseases are summarised from special quarterly statements supplied by Medical Officers, which give the numbers of cases originally notified and the final numbers after correction distinguishing sex and age. A table summarizing the previous quarter's sex and age distribution of the several notifiable diseases in England and Wales appears in this Return.

Note—The Returns for the quarters ending 30th June and 31st December contain lists of the changes of boundaries of administrative areas during the six months ending on these dates while summaries of certain figures for the year are published in the December and March quarter issues.

QUARTERLY DEATHS BY CAUSE DURING 1944-1946.

An appendix table (page 12) shows the deaths of males and females from 36 selected causes registered during each quarter of the years 1944, 1945 and March and June Quarters 1946. Corresponding figures for 1938, 1939 and 1940 were given in the Return for the March quarter of 1941. (For Rheumatic fever *see* page 12 of June Quarterly Return, 1941, and for Tuberculosis of the Meninges, etc., the Return for June, 1942.) Corresponding figures for 1941 to 1943 were shown in the Return for March, 1944.

NOTES ON THE THIRD QUARTER OF 1946

ENGLAND AND WALES.

Births.

The number of births registered during this quarter was 213,135, representing a birth rate based on the total population of England and Wales for 1946 of 19.7 per thousand. These figures compare with 167,807 births and a rate of 15.6 for the corresponding quarter of 1945; and an average birth rate for the third quarters of the five years 1940-1944 of 15.4. The number of births registered was the highest recorded for any quarter since 1921.

Of the births registered 109,598 were males and 103,537 females, a proportion of 1,059 males to 1,000 females. The average for the third quarters of the ten years 1936-1945 was 1,060.

The number of illegitimate births included in the total was 13,123 or 6.2% of the total births registered, compared with 15,243 or 9.1% in the corresponding quarter of 1945.

The 5,778 stillbirths represent 2.6 per cent. of the total births registered.

Deaths.

The number of deaths registered was 100,363 representing a death rate, based on the 1946 population, of 9.3 per 1,000, compared with 9.0 for the corresponding quarter of 1945 and an average death rate for the third quarters of the five years 1940-1944 of 9.8. Of the deaths registered 51,679 were males and 48,684 females, a proportion of 1,062 males to 1,000 females.

The deaths of children under one year of age numbered 7,052 representing an infant mortality rate, provisionally corrected, of 35 per 1,000 related live births; this was the lowest rate ever recorded and was 7 per 1,000 below the average rate for the third quarters of the ten preceding years 1936-1945. The diarrhoea death rate for children under two years of age was 3.2 per 1,000 live births (687 deaths) compared with 6.2, 5.5, 5.6 and 4.2 in the four preceding quarters.

Smallpox.

There were no cases of smallpox notified and no deaths registered during the quarter.

Natural Increase.

The births registered exceeded the deaths by 112,772, the corresponding increases for the third quarters of the years 1943, 1944 and 1945 being respectively 70,832, 76,340 and 70,648.

Marriages.

The number of persons married during the quarter was 218,094 which was 24,304 more than the average for the corresponding quarters of the preceding five years 1941-1945.

UNITED KINGDOM AND EIRE.

The number of births, deaths and marriages registered in the quarter are not yet available. (*See* the Returns published by the respective Registrars-General for Scotland, Northern Ireland and Eire.)

(a) Provisional.

(b) Note:—An exceptional number of marriages is celebrated at Easter which usually falls in the second quarter of the year. In the years under review, however, Easter Sunday fell in the first quarter in 1937 and 1940, with a consequential influence on the quarterly marriage totals for those years.

(c) Including Armed Forces and Merchant Seamen at home and abroad.

APPROXIMATE REPRODUCTION RATES.

These approximate reproduction rates correspond to the births which occurred in each year and make allowance for a continuing improvement in survivorship conditions.

EXPLANATORY STATEMENT

The figures relating to Births and Deaths are tabulated from Returns furnished by the Local Registrars, and those relating to Marriages from Returns received from the Clergy, Authorised Persons, Registrars of Marriages, &c.

In this Return births and deaths are classified by place of occurrence. For the purposes of the Annual Review, births and deaths will continue to be assigned by place of residence.

The deaths of non-civilians are excluded from tables IV, V, VI and X.

Estimates of Total National Populations are shown in table II and of Civilian National and Local Populations in tables IV, V and VI.

Meteorological information is suspended until further notice.

The figures relating to Notifications of Infectious Diseases are summarized from special quarterly statements supplied by Medical Officers, which give the numbers of cases originally notified and the final numbers after correction distinguishing sex and age. A table summarizing the previous quarter's sex and age distribution of the several notifiable diseases in England and Wales appears in this Return.

Note—The Returns for the quarters ending 30th June and 31st December contain lists of the changes of boundaries of administrative areas during the six months ending on these dates (see table IX) while summaries of certain figures for the year are published in the December and March quarter issues (see table X).

QUARTERLY DEATHS BY CAUSE DURING 1944-1946

An appendix table (page 13) shows the deaths of males and females from 36 selected causes registered during each quarter of the years 1944, 1945 and March, June and September Quarters 1946. Corresponding figures for 1938, 1939 and 1940 were given in the Return for the March quarter of 1941. (For Rheumatic fever *see* page 12 of June Quarterly Return, 1941, and for Tuberculosis of the Meninges, etc., the Return for June, 1942.) Corresponding figures for 1941 to 1943 were shown in the Return for March, 1944.

NOTES ON THE FOURTH QUARTER OF 1946

ENGLAND AND WALES.

Births

The number of births registered during this quarter was 221,891, representing a birth rate based on the total population of England and Wales for 1946 of 20.5 per thousand. These figures compare with 164,299 births and a rate of 15.3 for the corresponding quarter of 1945; and an average birth rate for the fourth quarters of the five years 1940-1944 of 14.7. The number of births registered was the highest recorded for any quarter since 1921.

Of the births registered 114,106 were males and 107,785 females, a proportion of 1,059 males to 1,000 females. The average for the fourth quarters of the ten years 1936-1945 was 1,053.

The number of illegitimate births included in the total was 11,219 or 5.1 per cent. of the total births registered, compared with 13,766 or 8.4 per cent. in the corresponding quarter of 1945.

The 6,124 stillbirths represent 2.7 per cent. of the total births registered.

Deaths

The number of deaths registered was 122,173 representing a death rate, based on the 1946 population, of 11.3 per 1,000, compared with 11.4 for the corresponding quarter of 1945 and an average death rate for the fourth quarters of the five years 1940-1944 of 12.3. Of the deaths registered 62,913 were males and 59,260 females, a proportion of 1,062 males to 1,000 females.

The deaths of children under one year of age numbered 9,139 representing an infant mortality rate, provisionally corrected, of 44 per 1,000 related live births; this was 7 per 1,000 below the average rate for the fourth quarters of the ten preceding years 1936-1945. The diarrhoea death rate for children under two years of age was 4.7 per 1,000 live births (1,044 deaths) compared with 5.5, 5.6, 4.2 and 3.2 in the four preceding quarters.

There were no deaths from smallpox registered during the quarter but there was one case notified as occurring in Beaconsfield U.D. (Bucks.).

Natural Increase

The births registered exceeded the deaths by 99,718, the corresponding increases for the fourth quarters of the years 1943, 1944 and 1945 being respectively 8,478, 54,902 and 42,063.

Marriages

The number of persons married during the quarter was 191,256 which was 20,187 more than the average for the corresponding quarters of the preceding five years 1941-1945.

UNITED KINGDOM AND EIRE

The number of births, deaths and marriages registered in the quarter are not yet available. (See the Returns published by the respective Registrars-General for Scotland, Northern Ireland and Eire.)

[Notes continued on page 11]

(a) Provisional.

(b) Note:—An exceptional number of marriages is celebrated at Easter which usually falls in the second quarter of the year. In the years under review, however, Easter Sunday fell in the first quarter in 1937 and 1940, with a consequential influence on the quarterly marriage totals for those years.

(c) Including Armed Forces and Merchant Seamen at home and abroad.

APPROXIMATE REPRODUCTION RATES.

These approximate reproduction rates correspond to the births which occurred in each year and make allowance for a continuing improvement in survivorship conditions.

TABLE IX.—CHANGES IN BOUNDARIES, NAMES, ETC., OF BOROUGHES, URBAN DISTRICTS AND RURAL DISTRICTS DURING THE SIX MONTHS ENDED 31ST DECEMBER, 1946

By Ministry of Health Order, under Section 145 of the Local Government Act, 1933, there was an exchange of area between Dagenham M.B. and Hornchurch U.D. (Essex), the date of operation being 18th October, 1946. The acreage is not yet available and no population was involved.

Under Section 5 of the High Wycombe Corporation Act, 1946, the name of Chepping Wycombe M.B. was changed to High Wycombe M.B. with effect from 1st August, 1946.

Notes—continued from page ii.

SUMMARY FOR ENGLAND AND WALES, 1946

The excess of live births over total deaths (registered in England and Wales) was 328,509. The corresponding excess for the preceding year was 197,165, and the average annual natural increase for 1940-1944 was 137,182.

Provisional rates per 1,000 population as at mid-1946 were as follows:—Persons married 17.9; Live births 19.1. Total deaths 11.5. Stillbirths were 27 per 1,000 total births and illegitimate live births 65 per 1,000 total live births. Infant mortality was 43 per 1,000 related live births.

The birth-rate was 3.0 above that of 1945 and was the highest recorded since 1923.

The effective reproduction rate corresponding to the births which occurred in 1946, after making allowance for a continuing improvement in survivorship conditions, is provisionally assessed at 1.102, indicating that the births of 1946 were 10 per cent. in excess of those required by a par replacement standard and representing a position not hitherto recorded since 1921. In view of the fact that 1946 is the first complete calendar year after the termination of the War, the experience must be expected to be an abnormal one.

Infant mortality was the lowest ever recorded in this country, being 2 per 1,000 below that of 1944 the previous lowest.

The proportion of stillbirths to total births was the lowest ever recorded in this country.

The death rate was 0.1 above that of 1945 but 0.3 below the average for 1941-5.

The illegitimacy rate amongst live births was 3 per 1,000 below the average for the five years, 1941-5.

The marriage-rate of 17.9 was 0.8 below that of 1945 but 1.2 above the average for 1941-5.

SUMMARY FOR THE YEAR 1946

MONTHLY DIGEST OF STATISTICS

The Digest, which is prepared by the Central Statistical Office in collaboration with the Statistics Divisions of Government Departments, provides industrialists and business executives with invaluable statistics relating to the economic situation in the United Kingdom. Where available pre-war figures are given as well as those for the war years, which were not then published for security reasons. Monthly figures are given for the last two years.

Statistical information is at present arranged under the following headings and the scope is revised from time to time to include new statistical information as it becomes available.

POPULATION
EMPLOYMENT
FUEL AND POWER
RAW MATERIALS
MANUFACTURED GOODS
BUILDING
AGRICULTURE AND FOOD
EXTERNAL TRADE
MERCHANT SHIPPING
INLAND TRANSPORT
FINANCE
WAGES AND PRICES

Price 2s. 6d. per copy

[2s. 9d. post free]

DEFINITIONS of Items and Units employed in the DIGEST
6d. [7d. post free]

Annual Subscription £1 12s. 6d., post free (including a copy of the Definitions)
